1. Introduction

Under SafeMa project the “study visits” (Task 1.3) represent the first important step for the development of the new curriculum. Under this activity five academic professionals from each partner University traveled to Greece and Denmark to witness in first-hand the teaching process, courses, services as well as other operational methods. This included participation in seances held by NKUA and UCN lectures that introduced participants to the theory-practice integration in clinical learning principles and techniques in midwifery training.

The Study Visits were held in Greece (Athens) from 14/11/2019 to 16/11/2019 and Denmark (Aalborg) from 17/11/2019 to 19/11/2019, where all partners from Europe and Asia have participated.

Midwifery represents a discipline and a profession. The SafeMa course underlies a body of scientific knowledge that would be developed with the integration of creative conceptualizations and formal research findings under WP1. The course knowledge will be constituted with the extant theories and frameworks that are the basis of research and practice endeavors, as well as will engage and combine a variety of information from a horizontal and multidisciplinary individual. The selection of the five participants was made via open procedures by the partners institutions in Vietnam and Cambodia based on the criteria posed by the consortium in order to ensure the principles of interdisciplinarity, interprofessionalism and representativeness of all stakeholders that are potentially involved in the design and academic and managerial implementation of higher institutions postgraduate diplomas and masters programmes. A specific attention was in the equity of gender, as well as no distinction in in race, religion, ethnic background, political affiliation, or any other division. The same principles were perspectives in the selection of the presenters and instructors from Greece and Denmark. Based upon this ground the study visit participants got above a wide range of expertise, covering from high executives of the Universities, such as deans, academics, and professionals in midwifery as well as HEIs administrative staff. More specifically the selection of the participants followed the forthcoming criteria:

- Working experience relevant to the project
- Teaching experience relevant to the project
- Experience in working in collaboration with clinical staff
- Experience in planning course programmes
- Experience in supporting students
- English Proficiency
- Commitment to participate in project activities

This report includes the training material that have been prepared for both Study Visits. More specifically, this report contains the results from each study visits, their agenda, the literature compendium, as well as indicative slides from the power points that have been performed throughout the study visits, participants lists, evaluation summary, and photos.

2. Study Visit in Greece

2.1. Results

2.1.1. Study visit in Athens, 14 to 16 November 2019

- Section 1: Discussion on the gap analysis results. The draft had been written and discussed before the meeting. However, in the meeting, participants contributed with further ideas for the improvement of the draft.
- Section 2: Association of the gap and educational needs in Cambodia and Vietnam. Participants had the chance to discuss on how to link the gap and the needs of midwiferies. These provided valuable evidence for developing a training curriculum in SafeMa hub.
- Section 3: Visit to maternity and gynecology health facility in University General Hospital. The visit was conducted during the afternoon of the first day. It was a wonderful trip that partners had the opportunity to learn a lot from different perspectives. For example, participants had the chance to come in touch with different methods to organize the clinic, patient's flow, response to patients, capacity of the hospital and its staffs, appointments etc.
- Section 4: Advanced midwifery practice postgraduate programs in low income countries. The program was introduced to the participants. Participants discussed on relevant curriculum and schedule in our countries and a possibility for application.
- Section 5: Advanced midwifery practice postgraduate programs in low income countries. This was one more chance to see a program and think about adaptations of in Vietnam and Cambodia.
- Section 6: Role of community in training midwifery. It was not new issue. However, Asian partners learnt more about how to co-ordinate with them in the project.
- Section 7: Educational curriculum and certification. An issue to think about how to collaborate with international partners in training midwifery.

- Section 8: Network event. It was a useful skype meeting with a professor from Tanzanian and think about how to create a network.
- Section 9: Educational curriculum for community midwifery care. It was an introduction of a project on training for midwifery.
- Section 10: An observation on training of trainers.
- Section 11: Meeting with related stakeholders and discussion on developing hub, creating network and collaboration.

2.4. Presentations

Below are some indicative slides of the power points that have been presented during the study visit in Athens. All presentations and the power points are uploaded and are available at the internal area of SafeMa project and the SafeMa website.

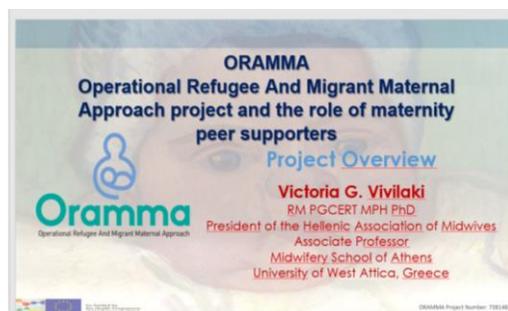

Karl – Phillip Puchner: SafeMa Gap Analysis Report

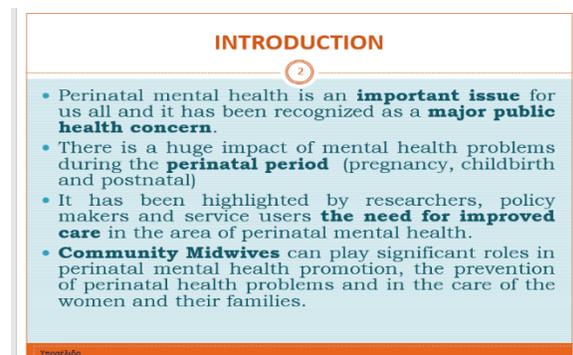

Antonia Manousaki: Antenatal Care for refugees

Victoria G. Vivilaki: ORAMMA, Operational Refugee And Migrant Maternal Approach project and the role of maternity peer supporters

Victoria G. Vivilaki: Integrating perinatal mental health into primary health: the role of community midwife

2.6. Evaluation Summary

Considering the evaluation sheets that participants filled the forthcoming outcomes have been provided. A detailed analysis of the outcomes is provided in the Quality Assurance and Evaluation Reports (D.4.3). Below are some significant graphics that capture the assessment of the Study visit.

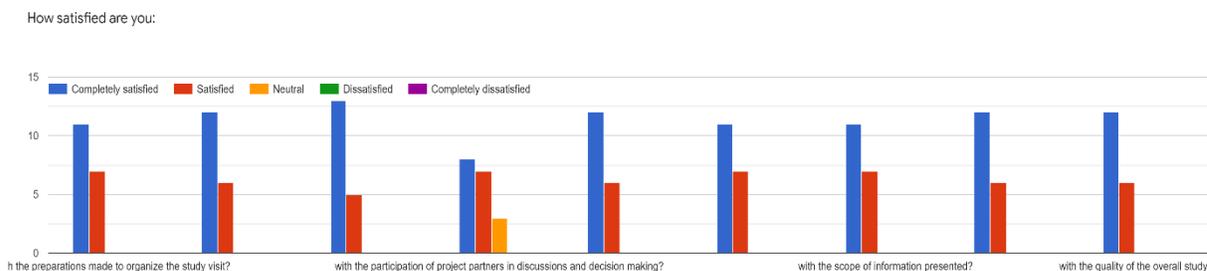

Figure 1 How satisfied are you?

What were the strengths of this study visit?

18 απαντήσεις

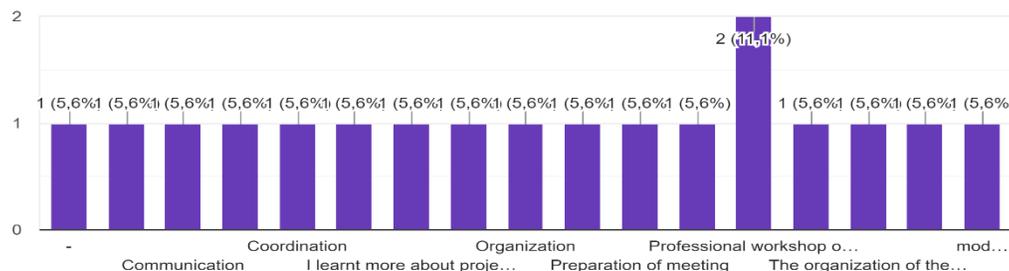

Figure 2 What are the strengths of the study visit?

What were the weaknesses of this study visit?

18 απαντήσεις

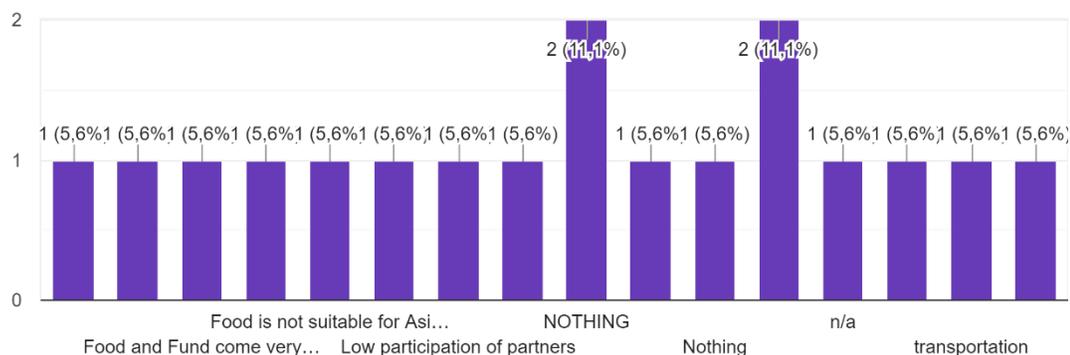

Figure 3 What are the weaknesses of this study visit?

Based on the results of the evaluation sheets most of the participants were *completely satisfied* or *satisfied* with the preparation and the organization of the study visit along with the participation of project partners in discussion and decision-making processes. Partners were all completely satisfied with the presentation of the information scope by NKUA team, as well as with the study visit in overall. According to the results the of the evaluation sheets the strengths of the study visit were its organization and the management by the Coordinator, as well as the content of the presentations from the NKUA scholars and professionals. Upon the same ground the greatest weakness that participants of the identified was the transportation barriers in Athens.

2.7. Participants Lists

Below are apposed the participation lists for the Study Visit in Athens, signed by all participants.

3. Study Visit in Denmark

3.1. Results

3.1.1. Study visit in UCN, 18 to 20 November 2019

- Section 1: Introduction to the UCN midwifery program in Aalborg. The introduction brought inside the training curriculum and the way to facilitate the students. The lessons learnt from this section were represented at the preparation and construction during the courses.
- Section 2: Evidence based practice. This section reminded the participants about using evidence in training and practicing. It also encouraged Asian partners to do researches in midwifery field and midwiferies should be trained and encouraged to do research too.
- Section 3: Visiting Aalborg University Hospital and meeting preceptors and students. It was an impressive section with the demonstration of preceptors, students, and facilitators. Participants learned about the whole process of how to facilitate a practical section. Reflection of all stakeholders were particularly important for further training.
- Section 5: Global sustainable lounge at health studies. It was nice and helpful to attend the meeting. Partners shared experience and developed their connections.
- Section 6: Information literacy – supporting research awareness, academic structure, and competence at UCN library. The visit at the library was helpful, accompanied with good presentations. Partners learned new way to access documents and training, as well as scientific materials.
- Section 7: Preparation of the eight postgraduate courses. All partners contributed ideas on contents of the eight postgraduate modules which should fulfil the gap and meet the needs of midwiferies in Vietnam and Cambodia.

3.3. Literature Compendium

The image shows the cover of a literature compendium. It features the SafeMa logo at the top left, which consists of a stylized white silhouette of a woman holding a baby against a red and yellow background. To the right of the logo, the text 'SafeMa' is written in large, bold, pink and yellow letters. Below the logo and text, the title 'Literature compendium' is centered in bold black text, followed by 'Study visit' and 'Aalborg 18-20 Nov. 2019'. At the bottom, the UCN logo is displayed, along with the text 'Co-funded by the Erasmus+ Programme of the European Union' and the European Union flag.

Information regarding chosen literature: Strauss et. al.

This is a brief introduction to the concept of evidence-based medicine.

We have chosen to present this concept to you, as it is an example of the literature we introduce and teach our students at the Danish Midwifery education at UCN. The concept of evidence-based medicine is in many ways a cornerstone in Danish healthcare professionals, including midwives, overall approach the their patients.

Material of the Literature Compendium:

1. Straus, S. E. 2005. Evidence-based medicine: how to practice and teach EBM. Edinburgh: Elsevier/Churchill Livingstone.
2. King, T. L. 2014. Varney's midwifery. Fifth edition. Burlington, Massachusetts: Jones & Bartlett Learning.
3. Squire, C. (Ed.). 2017. The Social Context of Birth. London: Routledge.
4. International Confederation of Midwives, 2014, International Code of Ethics for Midwives, Laan van Meerdervoort, Netherlands.
5. Macdonald, S., Johnson G., (Ed.). 2012. Mayes' midwifery. Fifteenth Edition. Edinburgh: Baillière Tindall Elsevier.
6. Johnson, R., & Taylor, W. (2000). Skills for midwifery practice. Edinburgh: Churchill Livingstone.

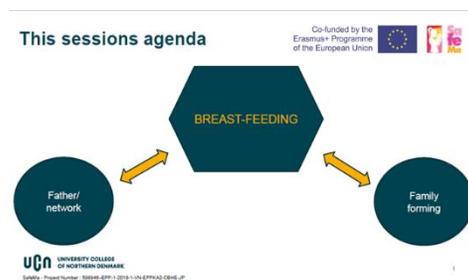

3.4. Presentations

Below are some indicative slides of the power points that have been presented during the study visit in Aalborg. All presentations and the power points are uploaded and are available at the internal area of SafeMa project and the SafeMa website.

Githa Cajus: Introduction to the UCN Midwifery Programme UCN, and Reflective- Based, Practice Learning

Malene Cohen and Ida Dayyani: Midwifery in the community - Family forming and Breastfeeding/the father

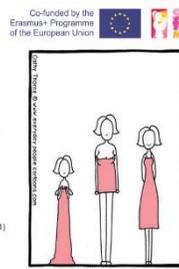

Lene Stumph Nielsen & Marie Louise Mastrup Knudsen: Clinical simulation as a base for reflection

Theory and clinical practice

- Theory is a statement about circumstances or situations in real life (clinical practice)
- Theory is a statement which is detached from each circumstances and situations
- *Reflection-in-action* and *reflection-over-action* can prevent our care from being routine-based (Schön 2001)

UCN UNIVERSITY COLLEGE OF NORTHERN DENMARK

Jane, Marie og Ingrid: Evidence based medicine

Why Evidence based medicine?

- Knowledge from gap-analysis:**
- low research awareness among midwives in your respective countries
 - a tendency to perform routine based care rather than individualised care
- Didactic approach**
- a short presentation (about 10 minutes) of the concept
 - group discussions.

- Some of the main principals in **Reflective practice learning:**
- to include the participants own experiences,
 - to make room for reflections, discussions, dialogue and feedback

UCN UNIVERSITY COLLEGE OF NORTHERN DENMARK

Marie Hald Thisted and Lene Toxvig: ICM and Human Rights. Ethics in Midwifery. Obstetric Violence

Aim and pedagogy

The aim of this session is to focus on a human rights-based approach and ethics as an essential part of midwifery.

The aim of this session is furthermore to encourage reflections

- On a human rights-based approach and
- On teaching ethics in midwifery in general and
- On how this can be transferred to your local context

Pedagogy in relation to the actual session is a combination of a presentation and reflections in smaller groups.

Pedagogy in relation to teaching ethics in The UCN Midwifery Programme is visualized by reflections in relation to deduce values from The international Code of Ethics.

3.6. Evaluation Summary

From the evaluation sheets that participants filled in Denmark the forthcoming outcomes have been developed. Partners' replies will be detailed analysed by the Quality Assurance and Evaluation Reports (D.4.3). Below are attached some significant graphics that represent the assessment of the Study visit in Athens form the participants.

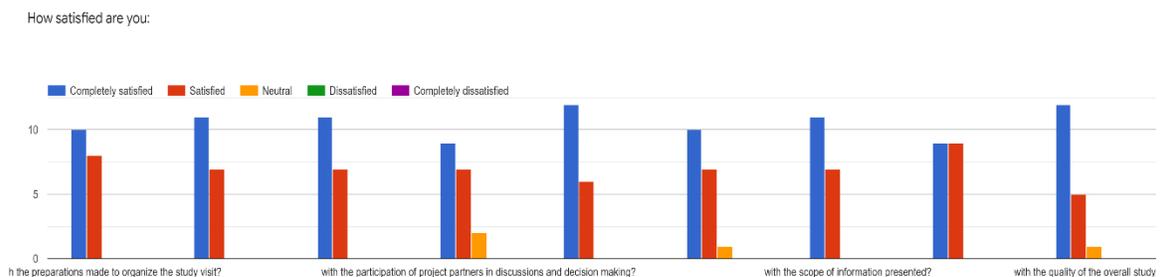

Figure 4 How satisfied are you?

What were the strengths of this study visit?

18 απαντήσεις

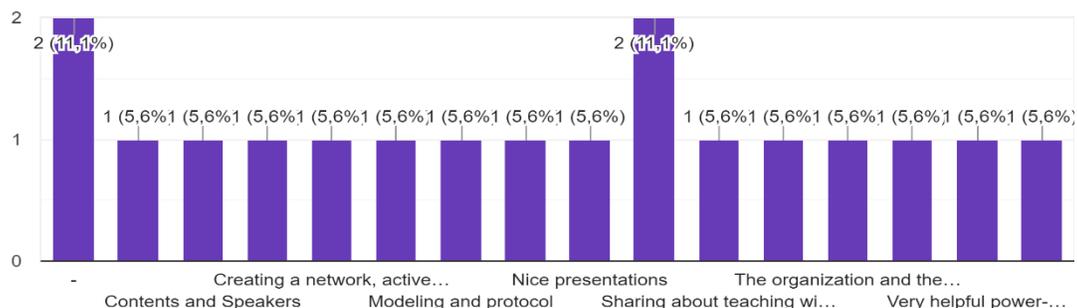

Figure 6 What are the strengths of this study visit?

What were the weaknesses of this study visit?

18 απαντήσεις

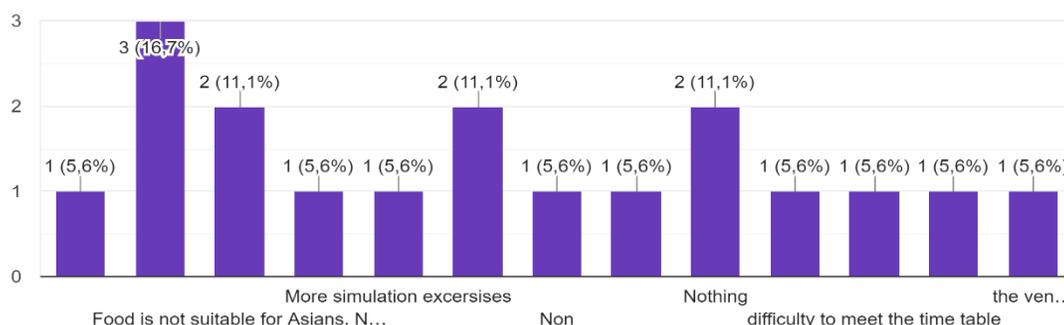

Figure 5 What were the weaknesses of this study visit?

According to the results of the evaluation sheets a great percentage of the participants were *completely satisfied* or *satisfied* with the preparation and the organization of the study visit and the participation of project partners in discussion and decision-making processes. Most of the participants declared almost *completely satisfied* with the presentation of the information scope, as well as overall with the study visit implementation. According to the results of the evaluation sheets, the strengths of the study visit were its management and coordination by UCN team members, as well as the content of the presentations that UCN professionals provided. Upon the

same ground the greatest weakness of the study visit in Denmark was the need for more simulation exercises and the food preferences.
